# How to in Details

## 1. How to install the script?

### Answer:

To install African Payment Gateway you need to follow the steps described below:

- Active eCommerce cms should be pre-installed on your server.
- Purchase and Download the African Payment Gateway Addon file.
- Login into your admin panel of the system.
- Go to Addon Manager.
- Click on Install New Addon.
- Choose the downloaded zipped file and click on Install.
- After Installation, you will find the African Payment Gateway in your left sidebar of the admin panel.
- Now you need to configure the African payment method Addon.

## 2. What features are included in the African Payment Gateway Addon?

**Answer:**

- Easy payment method configuration.
- The African Payment Gateway addon includes two payment gateways.
  - Flutterwave
  - Payfast
- African Payment method during checkout.
- African payment method during wallet recharge.
- African payment method during customer package purchase.

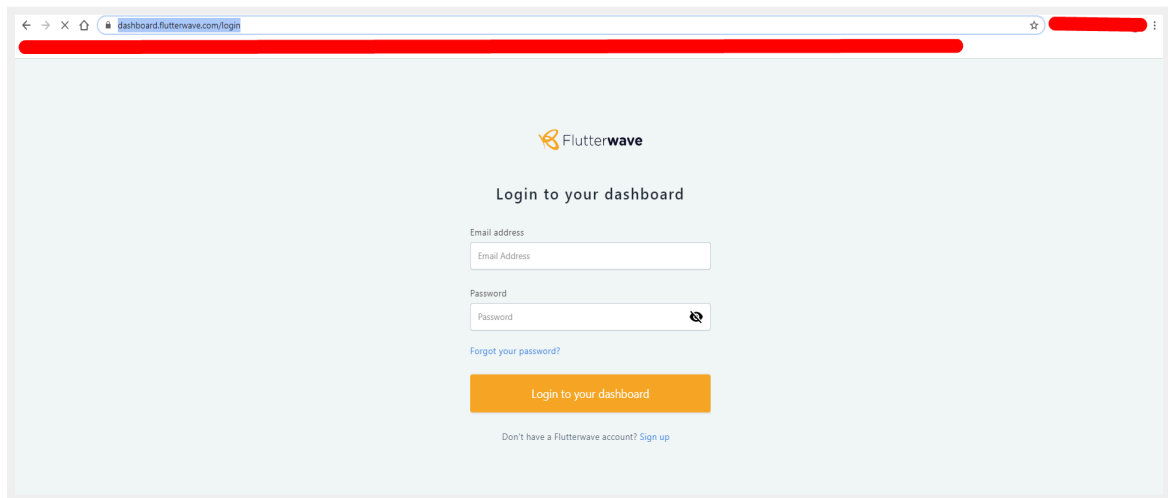

## 3. How to configure African Payment Methods?

**Answer:**

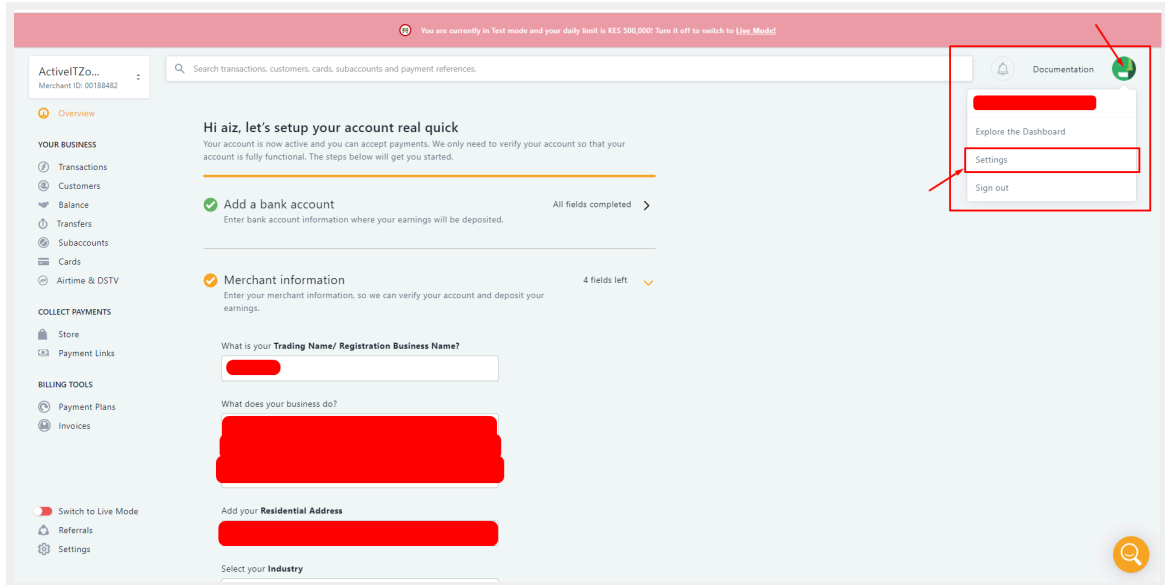

To configure the African Payment Methods the following steps should be followed:

**Flutterwave:** To configure Flutterwave follow the instructions described below:

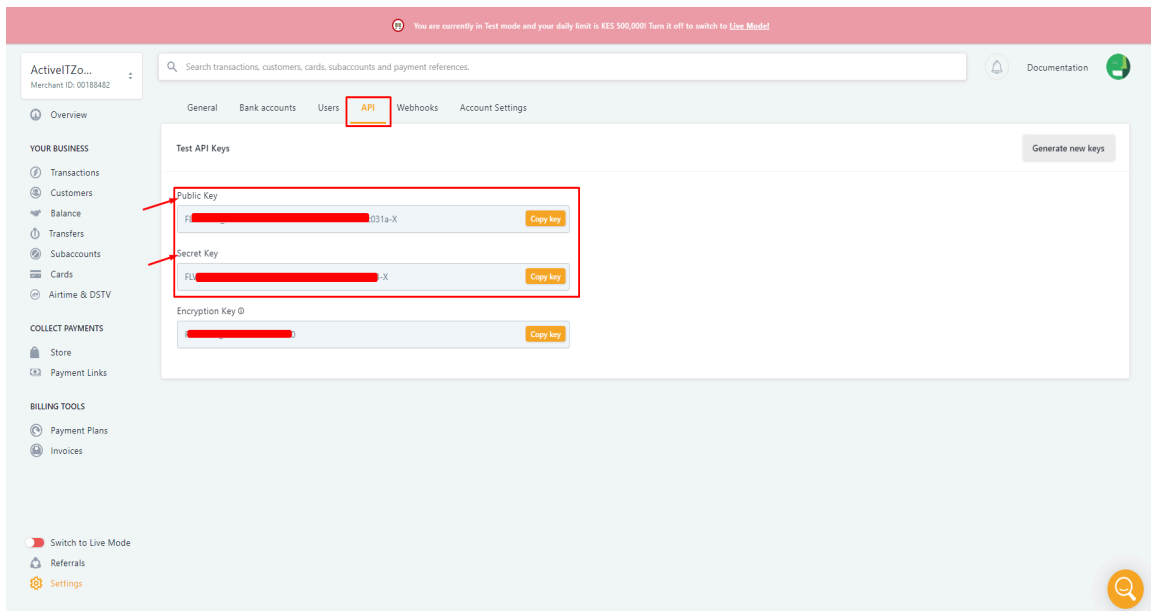

- Go to the sign-in page of Flutterwave [developer's dashboard](#) .

- After signing in or up you will be redirected to the dashboard.
- From the go to the **Settings** page.

- From there you need to go to the **API** submenu.
- There you will find two keys.
  - Public Key
  - Secret Key
- You need to copy these two keys.

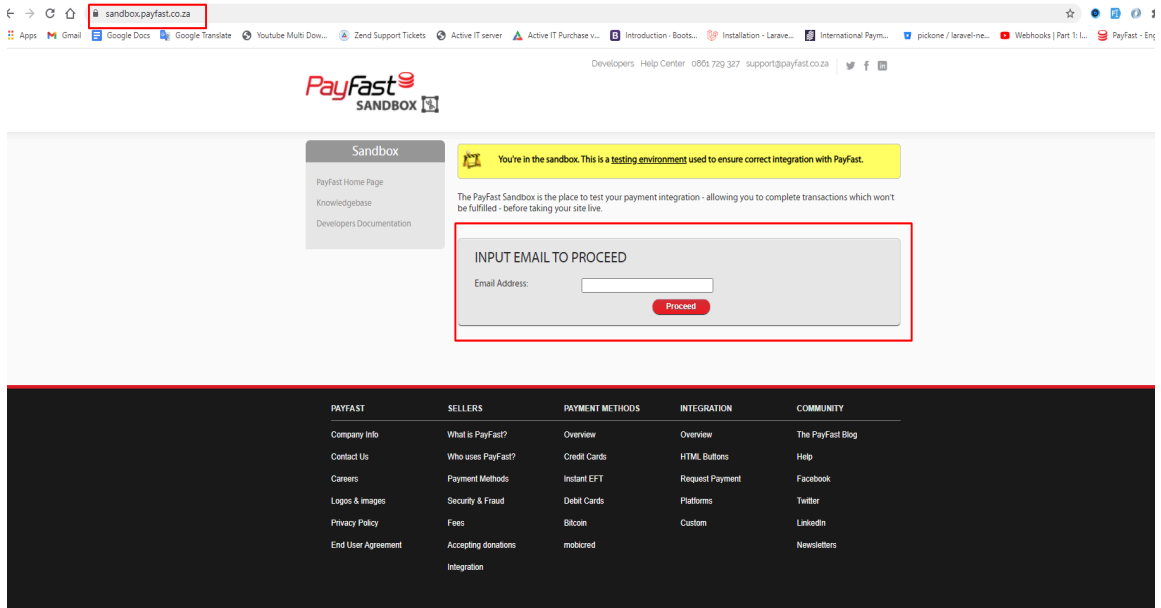

- Then go to the admin panel and from there go to **Business Settings-> Payment Method** and there in the **Flutterwave Credentials** section paste the copied keys in their own fields. Paste the **Public Key** inside the **Rave Public Key** field and paste the **Secret Key** inside the **Rave Secret Key** field.
- After that give a title to your account in the **Rave Title** section.
- Then select whether you want to test it inside the live mode or sandbox/staging mode. And then click save.
- To test it in sandbox you need to **activate the testing mode** in your dashboard. For that go to your flutterwave developer's dashboard account and then switch the **"Switch to live mode"** radio button off.

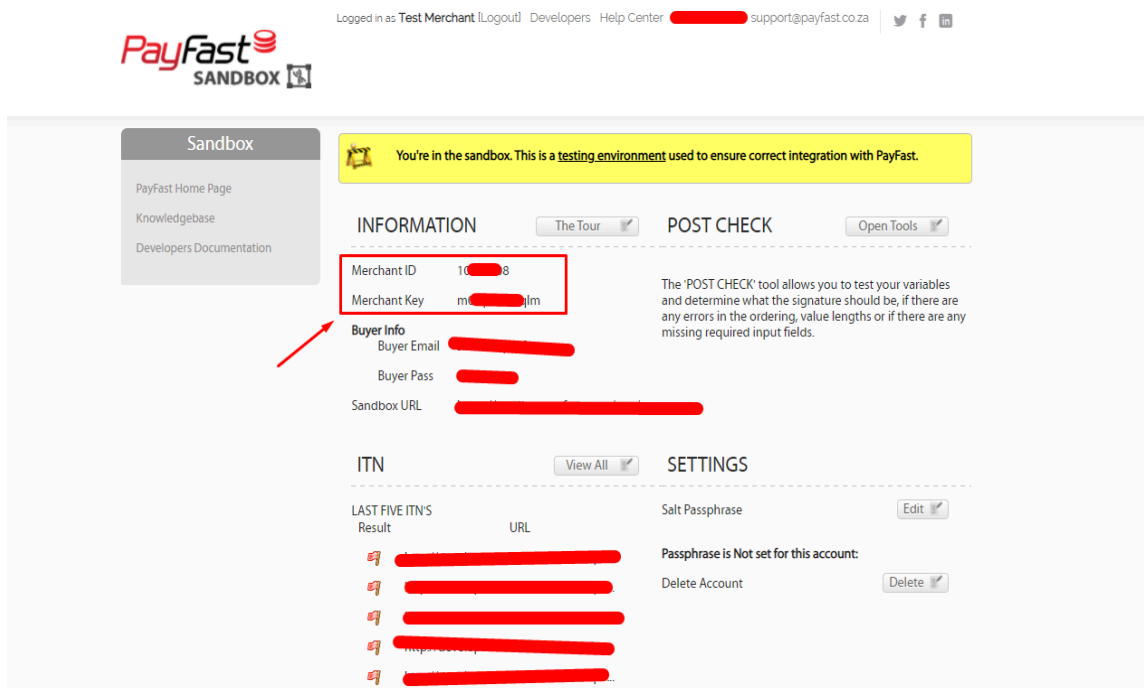

The screenshot shows the Flutterwave Merchant Dashboard. At the top, a pink banner indicates: "You are currently in Test mode and your daily limit is KES 500,000. Turn it off to switch to Live Mode". The left sidebar contains navigation links: Overview, YOUR BUSINESS (Transactions, Customers, Balance, Transfers, Subaccounts, Cards, Airtime & DSTV), COLLECT PAYMENTS (Store, Payment Links), BILLING TOOLS (Payment Plans, Invoices), Referrals, and Settings. The main content area is titled "Merchant information" and includes fields for "Trading Name/ Registration Business Name" (filled with "ActiveITZone"), "What does your business do?", "Add your Residential Address", and "Select your Industry". At the bottom of this section, there is a "Switch to Live Mode" toggle (currently off) and a "Save Compliance Information" button. A red box highlights the toggle, and a red arrow points to it from the "Settings" link in the sidebar.

### **Payfast :**

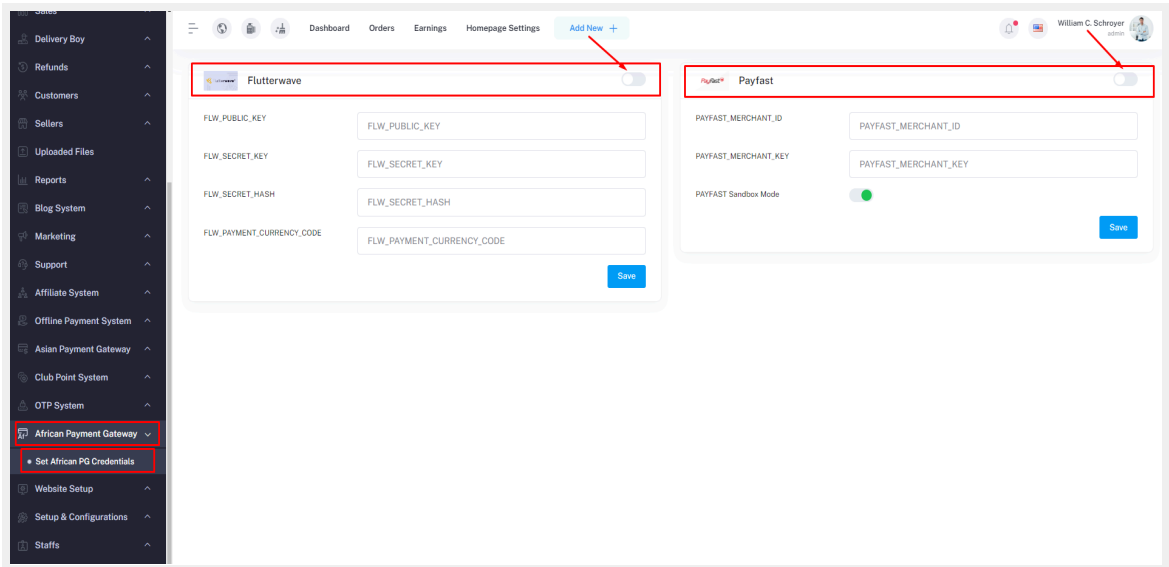

- Firstly got to pay <https://sandbox.payfast.co.za/>.

- Then after logging in copy the merchant id and the merchant key.

- After that paste it in the admin panel

- And make sure it is activated.

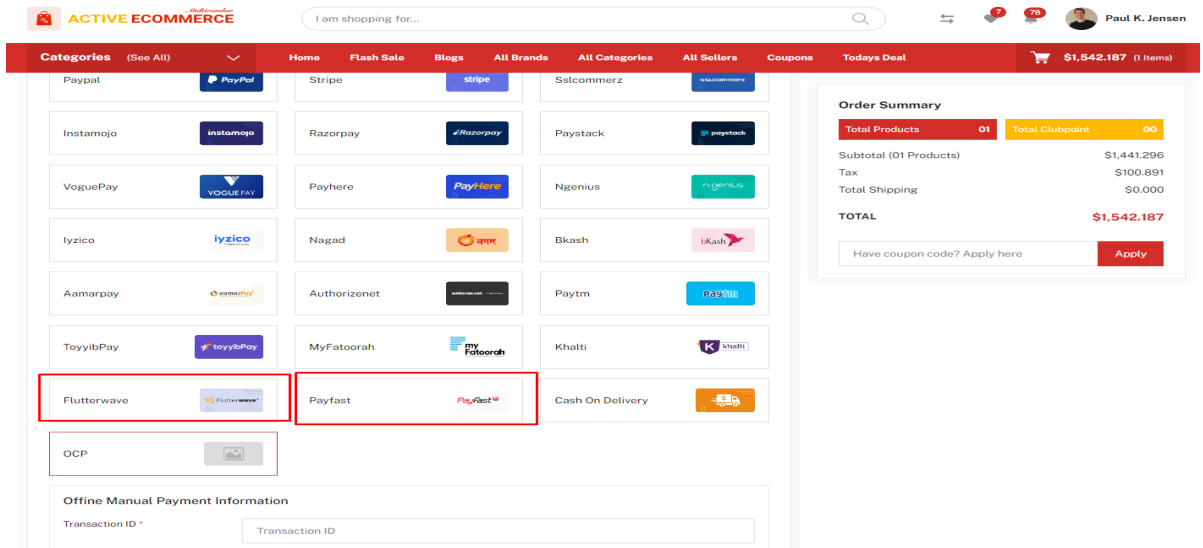

#### 4. How can a customer pay with African Payment Gateway?

##### Answer:

For a customer to pay with the African Payment Gateways he/she needs to do the following:

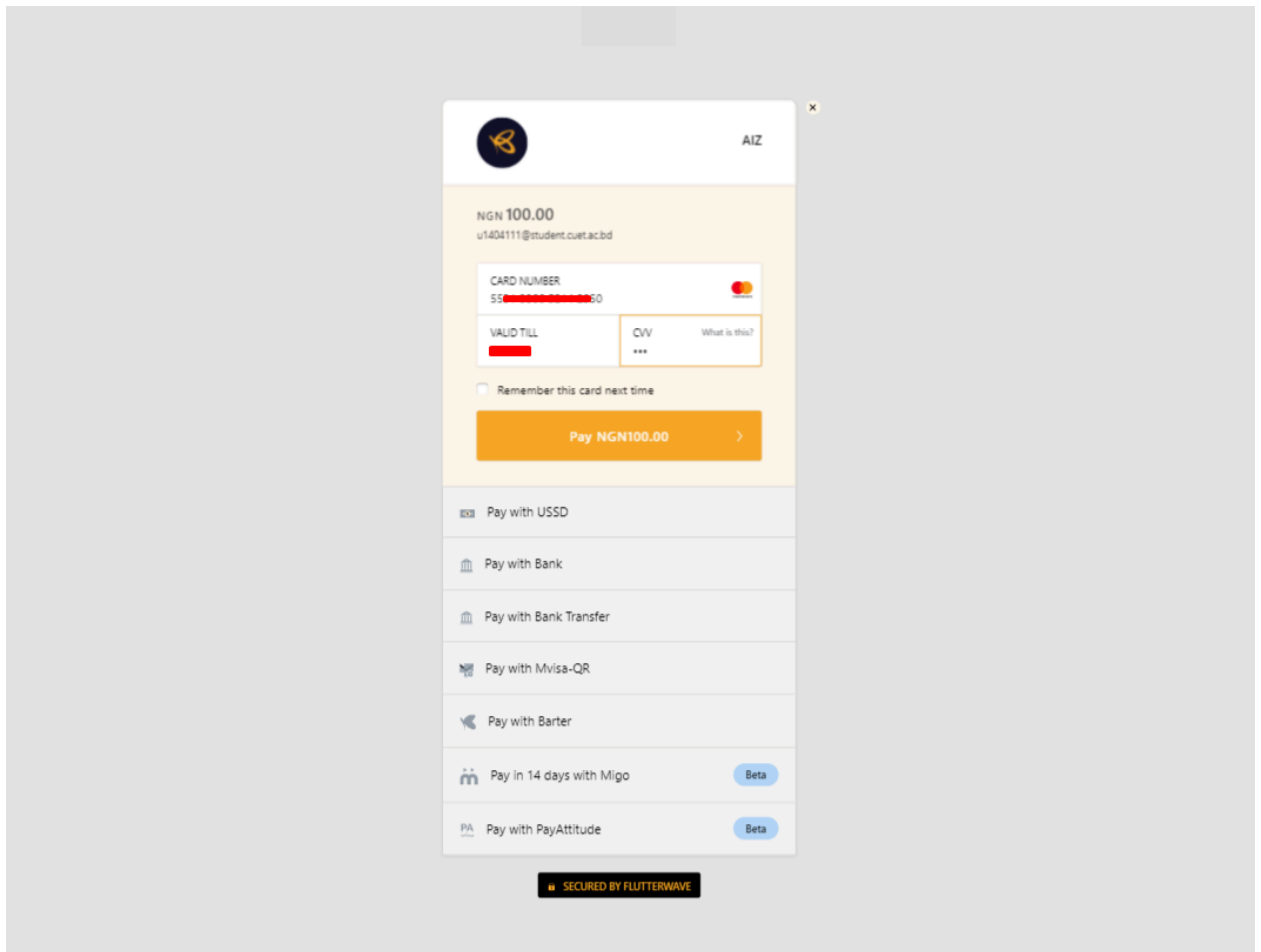

**Flutterwave:** For a customer to pay with flutterwave he/she needs to follow the procedures described below:

- The user needs to click the **flutterwave** image on the **order completing confirmation page**. Then **check** the **terms and policy agreeing checkbox**. Finally, click the **Complete Order** button to finalize the order.

- After clicking the completing order button the user will be **redirected** to the **flutterwave account credentials page**. And he will need to input his/her **account credentials**.

- After adding his/her credentials the user will be **redirected** to **another page** that requires him/her to enter the **4-digit card pin**.

AIZ

NGN 100.00

Enter your 4-digit card pin to authorize this payment

Four input boxes for the 4-digit PIN.

Pay with USSD

Pay with Bank

Pay with Bank Transfer

Pay with Mvisa-QR

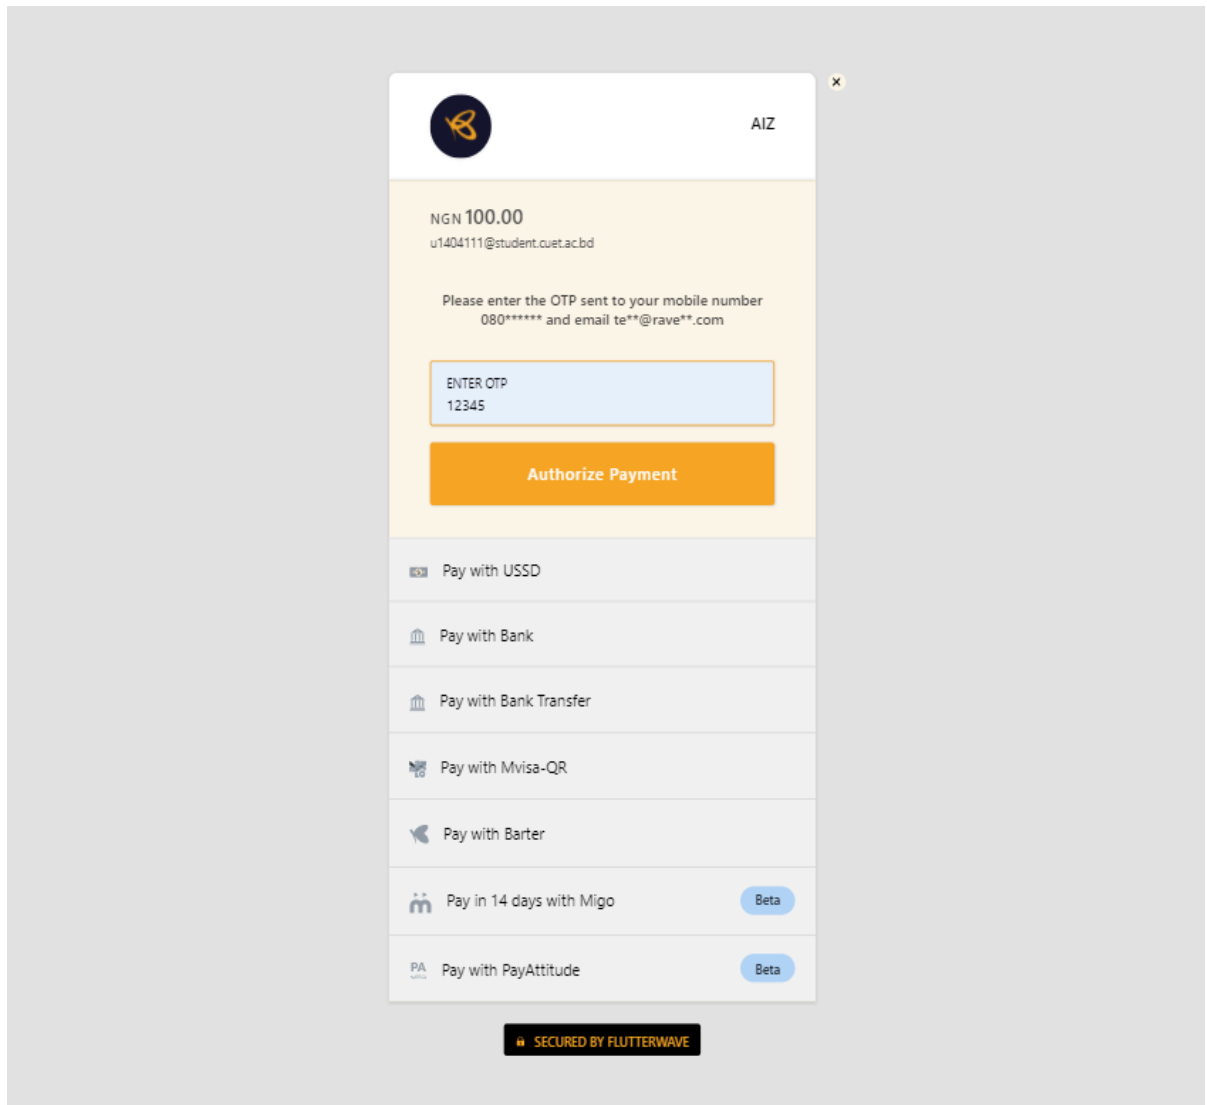

Pay with Barter

Pay in 14 days with Migo Beta

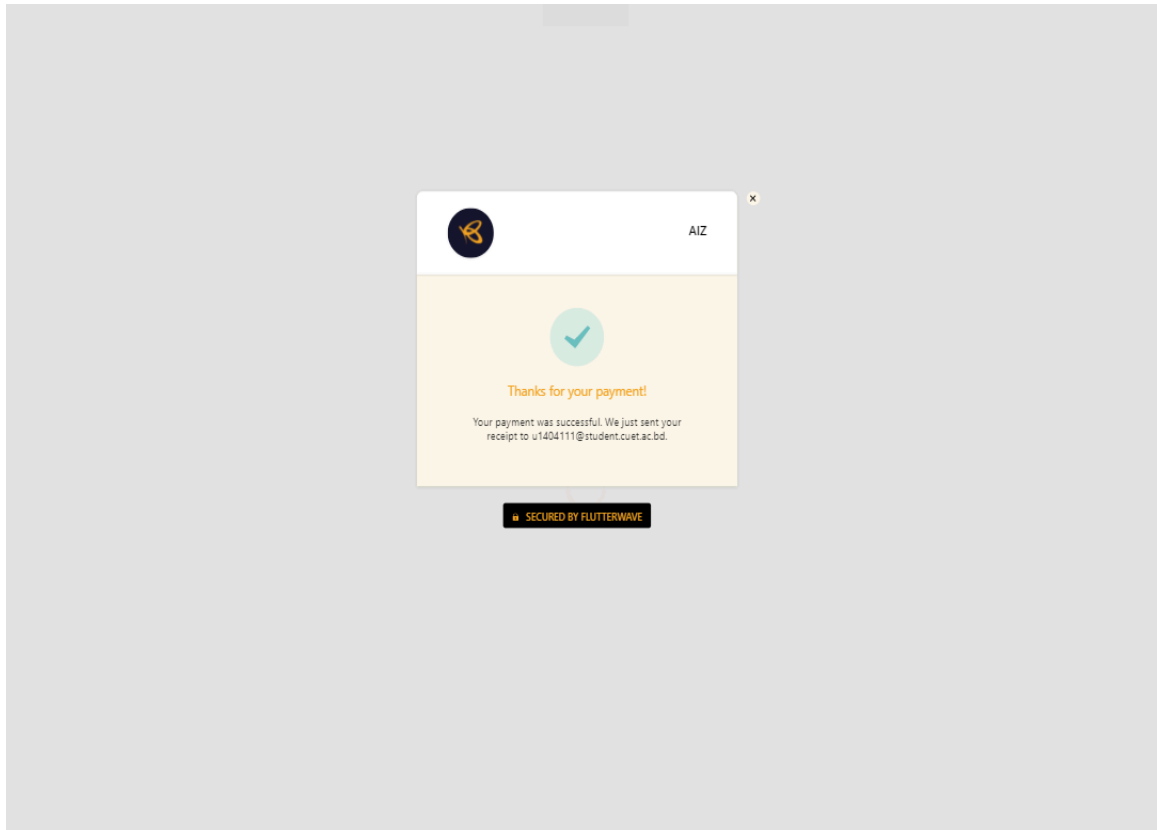

Pay with PayAttitude Beta

SECURED BY FLUTTERWAVE

- After entering the **4-digit pin** the user will be **redirected** to another page that will tell him/her to enter the **OTP** that has been sent to his/her mobile as well as email.

- Finally, if the user entered all the **credentials, pin and the OTP correctly** he should be redirected to a page that will let him know that his payment was either **successful** or **unsuccessful**.

- If the screen shown above appears, the user needs to **wait for a few seconds** (about 5-7 secs).
- Still if it does not redirect the user should try **refreshing the page without closing** the tab or window.
- If he does not wait his **payment result will not be saved** inside the database. But the payment will be **completed**.

**Payfast:** For a customer to checkout using the payfast gateway he/she needs to do the following:

- Go to the checkout page and select payfast.

- After that a page will come. Don't close it as it is very important to wait for 5-10 sec or the payment will not be saved.

And if the use followed everything thoroughly it should work perfectly.

## 5. How can a customer recharge his/her wallet with African Payment Gateway?

### Answer:

For the customer to recharge his/her wallet with African Payment Gateway the user needs to follow the steps described below:

- Firstly, the user needs to go to the **My Wallet** menu which resides inside his **panel**. From there he needs to click on the **Recharge Wallet** button. If he does so a modal will appear on the screen.

- After that the rest of the procedures are the **same as mentioned above** when explaining how to pay using the african payment gateway **on checking out**.

## 6. How can a customer upgrade his classified product package using the african payment gateways?

### Answer:

For a customer to upgrade his classified product package using the African payment gateways the customer needs to follow the steps described below:

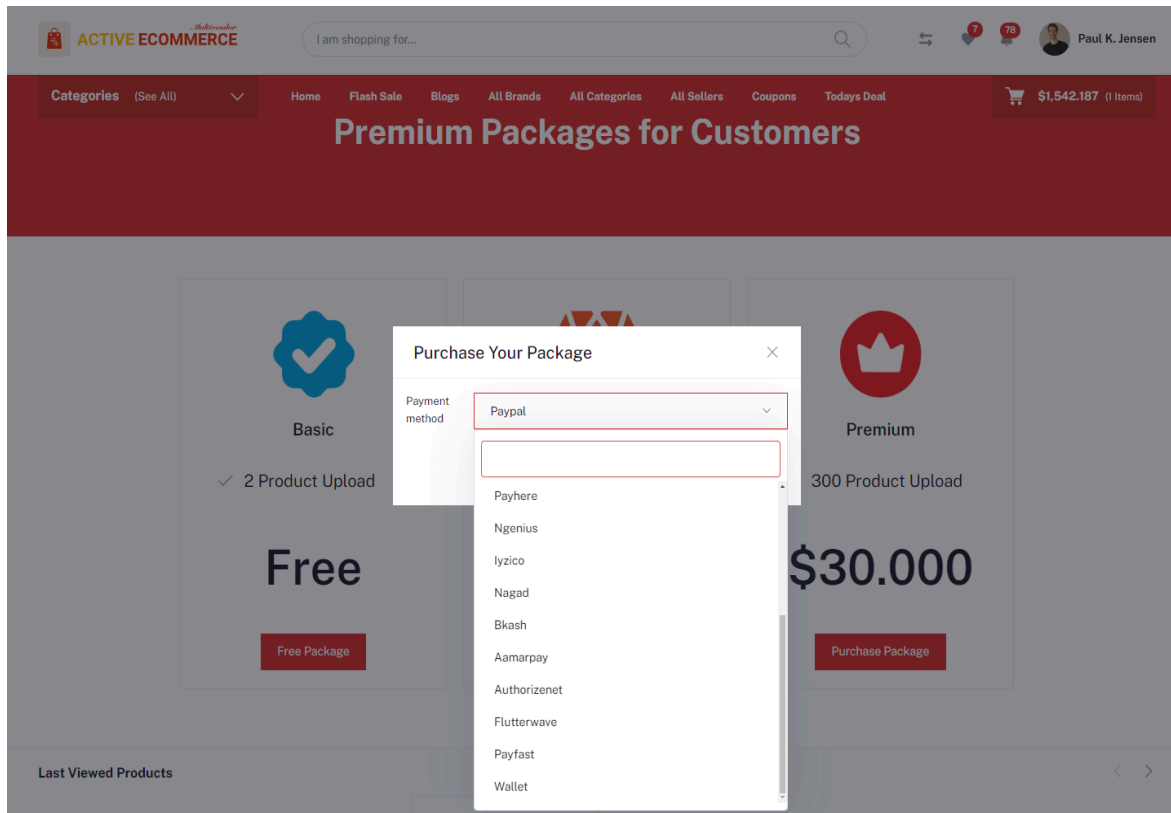

- The customer needs to go to his panel then to the **Classified Products** menu. There the customer needs to click on the **upgrade package** button.

The screenshot displays the user interface of the Active eCommerce CMS. The top navigation bar includes links for 'Become a Seller', 'Login to Seller', and 'Helpdesk'. The main header shows the user's name 'Paul K. Jensen' and a shopping cart with 1 item valued at \$1,542.187. The sidebar on the left contains a list of navigation options, with 'Classified Products' highlighted. The main content area shows the 'Classified Products' section with three cards: 'Remaining Uploads 576', 'Add New product', and 'Current Package: Premium' with an 'Upgrade Package >' button. Below these cards is a table titled 'All Products' listing three items with their respective prices and statuses.

#	Product	Price	Available Status	Admin Status	Options
01	Women's Two-Piece Dress with Embellished Jacket (Petite and Regular)	\$149,000	On	Published	Edit, Delete
02	Adrianna Papell Women's Long Beaded Dress	\$229,000	On	Published	Edit, Delete
03	Xscape Women's Long Off Shoulder Sweetheart Neck Side Ruffle Gown (Reg and Petite)	\$279,000	On	Published	Edit, Delete

- If the customer clicks on the button mentioned above he/she should be **redirected** to the **customer packages** listing page. From there the customer needs to click on the **Get Package** button of his/her choice. If he/she does so he/she should see a modal **similar** to the one he/she saw **during wallet recharge**. And from there he/she will be able to select the **payment gateway** of his/her choice.

- The rest of the procedures of completing the payment are the same as mentioned previously.
